PROJECTS

JAC (Academic, COMP 1800)

Jan 2025 – April 2025

A gamer matchmaking app that connects users based on their preferences using a custom algorithm. Includes features such as messaging, posting, and community channels, similar to Discord.

- Written in JavaScript, HTML, and CSS/Bootstrap.
- Used Firebase for database management and backend services.
- Developed in a group of 3.

BCIT Connect (Academic, COMP 2800)

Apr 2025 – May 2025

Connects BCIT students and alumni using an AI-based matching system.

- Written in JavaScript, Node.js, EJS, and CSS/Bootstrap
- Utilized MongoDB for database management and backend logic
- Developed in a group of 5.

EXPERIENCE

Sales Associate - The Home Depot

July 2022 - Present

- Developed strong verbal communication skills through daily customer interactions and product explanations.
- Collaborated with a large, diverse team — comfortable working in team environments and cross-functional roles.
- Improved time management by balancing multiple responsibilities in a fast-paced retail setting.
- Gained experience handling feedback constructively and staying calm under pressure.

Sales Associate - Value Village

July 2020 – May 2022

- Maintained accuracy and attention to detail while sorting, tagging, and organizing inventory in a high-volume environment.
 - Demonstrated initiative by identifying workflow inefficiencies and helping streamline daily operations.
 - Adapted quickly to a constantly changing inventory system and shifting team responsibilities.
 - Assisted customers with unique requests and resolved issues independently, strengthening creative problem-solving skills.
 - Balanced multiple tasks efficiently while maintaining high customer service standards.
-
