ARSHIA ADAMIAN

(236) 858-9008 • adamianarshia@gmail.com
https://github.com/arshiaadamian • https://www.linkedin.com/in/arshia-adamian

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL, Python, HTML/CSS, C/C++, Kotlin
Frameworks: React, React Native, Node.js, Express.js, Bootstrap
AWS: Lambda, API Gateway, DynamoDB, Cognito, EventBridge, Bedrock, IAM
Tools & Platforms: Git, GitHub, Bitbucket, VSCode, Postman, DBeaver, Northflank, Agile/Scrum
Database & APIs: MySQL, MongoDB, REST APIs, OpenAI API, Groq API

EXPERIENCE

Peer Tutor - BCIT Learning Commons Sep 2026 - Present

- Tutor BCIT students in object-oriented programming and math, explaining core concepts and helping them debug their own code

Software Developer - Reva Solutions Jan 2026 - Aug 2026

- Built and deployed an AI-powered automation tool with custom LLM logic, integrating front-end components with backend services in production
- Designed and implemented REST API (GET/POST) integrations across multiple enterprise systems, validated and tested with Postman
- Delivered a full integration end-to-end, including the interface, backend business logic, and supporting components, shipped to production
- Diagnosed and resolved broken legacy components, tracing root causes and implementing sustainable fixes across existing pipelines
- Participated in Agile stand-ups, contributing to sprint planning, peer code reviews, and documentation

PROJECTS

DailyByte | iOS Learning App - Solo Jul 2026 - Present

- Built and shipped a notification-first iOS learning app to the App Store, with a React Native/Expo frontend and a fully serverless AWS backend
- Architected the backend on AWS Lambda, API Gateway, DynamoDB, Cognito, and EventBridge Scheduler, with per-user timezone-aware scheduling and JWT-secured endpoints
- Integrated Amazon Bedrock to generate personalized content on a schedule, designing prompt constraints and defensive parsing, handling auth, data, and delivery end to end

Flowdeck | BCIT Student Tool - Solo Jan 2026 - Apr 2026

- Built and published a Chrome extension (Manifest V3) with a React UI and Node.js/Express backend on TypeScript/JavaScript, serving 25 active users
- Designed a two-layer caching strategy (shared server-side cache per course plus client-side storage), cutting repeat load times to near zero and minimizing redundant AI calls

BCIT Connect | BCIT Projects 2 - Team of 5 May 2025

- Led backend development for a mentorship platform built with JavaScript, Node.js, MongoDB, EJS, and Bootstrap, implementing AI-driven matching using OpenAI embeddings
- Delivered a fully functional deployed application graded A+ by BCIT faculty

EDUCATION AND CERTIFICATION

British Columbia Institute of Technology Jan 2025 - Present
Computer Systems Technology (CST) Diploma
GPA: 92%

AWS Certified Cloud Practitioner 2026
